

CONVICTION RECORD OF ARRESTS AND PROSECUTIONS (RAPSHEET)

Washington State Patrol

Identification and Criminal History Section

January 2016

Agenda

- Criminal History Beginnings.
- The Section.
- Criminal History and Criminal History Flow.
- Conviction Information.
- Washington Access to Criminal History.
- Record of Arrests and Prosecutions (RAPsheet).
- Compromised Identity Claim Card (CICC).
- Section Contact Information.

Criminal History Beginnings

- In the early 1900s criminal history record information (CHRI) was collected by the Bureau of Criminal Identification (BCI). The BCI resided at the Walla Walla State Penitentiary.
- In 1961 the legislature did not provide funds for the continuance of the BCI and it closed. At the time of the closure 660,000 plus records were placed in storage until 1972.

The Section

- In 1972 the legislature created the Criminal Records Division (CRD), Identification and Criminal History Section (referred to as the Section) per Revised Code of Washington (RCW) 43.43.700 as the central repository for criminal records for the state of Washington.
- It is the duty of the sheriff or director of public safety of every county, and the chief of police of every city or town, and of every chief officers of other law enforcement agencies duly operating within this state, to cause the photographing and fingerprinting of all adults and juveniles arrested. [RCW 43.43.735 and .740]

The Section (cont.)

- The court is responsible to provide the disposition to the Section. [RCW 10.98.080]
- It is the duty of the law enforcement agency and at a preliminary hearing or arraignment the judge is responsible to ensure that the felony defendants have been fingerprinted and an arrest fingerprint form transmitted to the Section. The juvenile court administrator will initiate an arrest fingerprint form and transmit it to the Section. [RCW 10.98.050]

The Section (cont.)

- Once the Section was established, the 660,000 plus records were shipped to Olympia.
- Section staff reviewed the records and based on specific requirements only 20,000 records were entered into the Washington State Identification System (WASIS) criminal history database.
- Criteria used to determine which records to retain included the quality of the fingerprints, the age of the person, and whether the person was still active in the criminal justice system or incarcerated.

The Section (cont.)

- The Section located in Olympia is the only WSP office that provides the following services to the public, businesses, or organizations.
 - Applicant fingerprinting.
 - Notary letters.
 - Background checks
 - Washington Access to Criminal History (WATCH).
 - Record Review Challenges

CHRI

- What is criminal history record information (CHRI)?
 - CHRI consists of identifiable descriptions and notations of arrests, detentions, indictments, informations, or other formal charges and any disposition arising therefrom. [RCW 10.97.030(1)]
- In 1992 the State of Washington became a single source contributor to the FBI. This means all requests for CHRI from the FBI must first undergo a state background check before being forwarded to the FBI from the Section.
 - Non-criminal justice agencies must have a state statute authorizing a federal background check in order to conduct a background check through the FBI.

CHRI (cont.)

- When a fingerprint card is received at the Section, the fingerprints are searched against the Automated Biometric Identification System (ABIS) which houses the fingerprint images of all records contained in the repository.
- If a record is found, a conviction RAPsheet will be returned to the requesting non-criminal justice agency via email.
- If no record is found, a “No Record Found” message is returned to the requesting non-criminal justice agency via email.
- If an FBI search is authorized the fingerprints are transmitted to the FBI. The FBI response is returned via email to the requestor.

Conviction Information

- Conviction information [RCW 10.97.030(3) and .030(4)]
 - Washington State only conviction information
 - Guilty and adverse findings.
 - Adverse findings: Acquitted by Reason of Insanity, Dismissed by Reason or Incompetency, etc.
 - Open arrests less than one year old without a disposition.
 - Available to the public, businesses/organizations and criminal justice agencies.
 - Conviction data may be disseminated without restriction. [RCW 10.97.050(1)]

Non-conviction Information

- Non-conviction information
 - Nonconviction data consists of all CHRI relating to an incident which has not led to a conviction or other disposition adverse to the subject, and for which proceedings are no longer actively pending. [RCW 10.97.030(2)]
 - Certified Criminal Justice Agencies receive both non-conviction and conviction data.

CHRI Flow

1. A person is arrested and taken to a booking station, normally a jail facility.
2. The person is fingerprinted and fingerprints/arrest information is forwarded to WSP (electronically or mailed).
3. At the same time a disposition is forwarded to the prosecutor or appropriate court to determine if charges will be filed.
 - a) If no charges are filed the prosecutor or court provides a “No Charges Filed” disposition to WSP.
 - b) If charges are filed the appropriate court hears the case and provides the disposition to WSP.
4. ABIS and WASIS are updated with the criminal history.

Criminal History Flow Chart

WATCH

- The Washington Access to Criminal History (WATCH) website is an online service for conducting Washington state criminal history background checks. The website address is: WATCH.wsp.wa.gov
- Requirements
 - Credit card to pay fee (fee information is available on the website).
 - The person's name and date of birth (DOB).
- The result of the background search is available in the WATCH Inbox online.
- For more information on WATCH, contact the Background Unit at (360) 534-2000 option 2 or send an email to Watch.Help@wsp.wa.gov.

Record of Arrests and Prosecutions

- Record of Arrests and Prosecutions (RAPsheet) information is a fingerprint based record of a person's arrests and prosecutions in Washington State.
 - If a person was not fingerprinted, there is no criminal history in the WASIS database. For instance, if a person was cited and released without being fingerprinted, that arrest citation information would not be available on a Washington state background check.
- Name and Date of birth background checks are only as good as the name and birth provided. It is not uncommon for individuals to use someone else's identity at the time of arrest.

Example RAPsheet

NOTE: Information in the shaded areas in the following RAPsheet example is for training purposes and will not appear on a RAPsheet.
