

WASHINGTON STATE PATROL

2715 Rudkin Road, Union Gap, WA 98903 | 509-575-2320 | trevor.downey@wsp.wa.gov

BIOGRAPHY

On September 4, 2007, I was hired as a Trooper Cadet with the Washington State Patrol. I was assigned to the Washington State Patrol Academy in Shelton, Washington to go through a six week academy Arming Class.

In July of 2008, I was selected to attend the 96th Trooper Basic Class at the Washington State Patrol Academy. I completed the academy after six months of training and was commissioned on January 30, 2009. While in the academy, I became a certified BAC Datamaster operator which included NHTSA DUI detection and SFST training. I was assigned to the Sunnyside Detachment until July of 2013. I was selected to join the new Target Zero DUI team in Yakima with 5 other Troopers where I still currently work.

In 2010, I applied for and was selected to attend the Drug Recognition Expert School, class number 22, in Richland, Washington. I successfully completed the training and became a certified Drug Recognition Expert.

In 2011, I applied for and was selected to attend the SFST instructor developmental class in Yakima, WA. I successfully completed the training and became a standardized field sobriety test instructor. I taught multiple SFST refresher classes across Washington State.

In 2012, I also taught several SFST refresher classes in Yakima County and one in Walla Walla County. Because of the new laws in Washington State, I have been trained on the new felony DUI laws as well as the new I-502 marijuana reform.

My current assignment is on the Target Zero DUI team for Yakima County. My goal is reduce injury and fatality collisions on state routes, interstates and county roads by removing impaired drivers off the roadway.

I won the Drug Recognition Expert of the year for region 3 for 2012.

In 2015, I was selected and became a Field Training Officer.

In 2016, I was selected to go to the Impaired Driving's Section's BAC technician training. I completed the training and became a certified BAC technician. As a backup technician, my responsibilities can include: maintaining, troubleshooting and repairing breath testing instruments, provide expert testimony and provide training to law enforcement agencies.

EDUCATION

Ellensburg High School, Ellensburg, WA
