

NFPA 25 – Step by Step Testing .5 Day/4 Hours

Course Synopsis:

This course reviews step by step instructions on performing the most common tests required by NFPA 25 including main drains, valve operation, dry valve full and partial trips, pressure reducing valves, and others. These procedures are a great guide for contractors and service providers to use in training inspectors and creating quality control procedures to ensure that the required tests are completed as mandated by the standard. Attendees will learn to identify and apply testing procedures that will help ensure that systems function properly and assist in limiting the potential liability that comes with having standard testing procedures.
