

APPOINTMENTS ARE REQUIRED FOR ALL INSPECTIONS (No walk-ins please)

Please refer to the WSP web page <http://www.wsp.wa.gov/traveler/vinspect.htm> for further information, or call your local VIN Officer if you have any questions (contact information is available on the same web page).

Why the Inspection and What Will be Inspected?

[RCW 46.12.560](#) authorizes the Washington State Patrol to inspect certain vehicles for titling purposes. These inspections serve to prevent the trafficking of stolen vehicles and stolen parts.

The Vehicle Identification Number (VIN) Officer will inspect all major component parts used to construct your vehicle. Documentation must be presented at the time of the inspection to show legal ownership of the vehicle and parts used. Also, your vehicle must comply with all of the equipment requirements of [WAC Title 204](#) and [RCW 46.37](#) to pass inspection and for a VIN to be assigned.

What is a Homemade Vehicle?

According to [WAC 308-56A-455](#), a homemade vehicle is one that has been constructed from any combination of new, used, or homemade parts that does not resemble a vehicle that was manufactured under a specific year, make, and model by a manufacturer. This includes:

- (a) A vehicle that has been structurally modified so that it does not have the same appearance as a similar vehicle from the same manufacturer;
- (b) A vehicle that has been constructed entirely from homemade parts and materials not obtained from other vehicles; or
- (c) A vehicle that has been constructed by using major component parts from one or more manufactured vehicles and cannot be identified as a specific make and model.

All homemade vehicles of a type requiring registration must be certified by the owner to meet all applicable federal motor vehicle safety standards in effect at the time construction is completed.

How is the Model Year Determined?

The model year will be determined at the time of your inspection based on what the vehicle most closely resembles as directed by [WAC 308-56A-160](#).

What Parts are Required for My Vehicle to Pass Inspection?

According to [RCW 46.80.010](#), major components parts required for titling your vehicle include:

- (a) engines and short blocks; (b) frame; (c) transmission and/or transfer case; (d) cab; (e) door; (f) front or rear differential; (g) front or rear clip; (h) quarter panel; (i) truck bed or box; (j) seat; (k) hood; (l) bumper; (m) fender; and (n) airbag.

Please note your vehicle will not pass inspection if any major component parts are damaged or missing. If originally installed in your car, airbags must be included and must be in working order.

What Documents are Required for a Complete Inspection?

Documents presented at time of inspection must be original (*meaning: Being the first form or occurrence*). **Faxes or copies will not be accepted.**

- [Washington State Patrol Inspection Request](#) form completed by the licensing agent. (*The WSP will not be able to conduct an inspection without this **fully completed** form.*)
- [Valid Picture Identification](#)

- Weight Slip from a certified scale for the completed vehicle.
- Certificates of Title or Receipts for Major Component Parts. All receipts must be made out to you, the vehicle owner, your immediate family member, or the licensed shop that built your vehicle.

Major component parts purchased from a third party require a notarized bill of sale from the original purchaser to you and the original parts receipts—or, in the case of a licensed business, a letterhead statement of transfer to you and the original parts receipts.

Parts purchased from a **licensed business** must be presented with an original sales receipt. The receipt must show the name and address of the business, a description of the parts sold, the date of sale, and the purchase price.

Parts purchased from a **licensed vehicle wrecker** must be presented with an original sales receipt to include the wrecking yard name and address, a description of the parts sold, the date of sale, the amount of sale, and the stock number and/or VIN of the vehicle the parts came from.

Parts from a **private party** must be presented with a signed and released title to the vehicle the parts came off of, or a notarized bill of sale. The notarized bill of sale/gift/trade must include the name, address, phone number of the seller and purchaser, a description of the parts sold, vehicle information the parts came off of (to include year, make, model, VIN), the date of sale, and the purchase price.

Parts purchased from the **Internet or electronically** will only be accepted for new, aftermarket components. The Internet or electronic receipt must be accompanied by the original packing slip/shipping invoice. You must print out a copy of the receipt to present to the VIN Officer at the time of inspection. The printed receipt must include the business name, address, phone number, date of purchase, description of part, purchase price, and tax paid.

What If I Am Unable to Provide an Acceptable Release of Interest or Proof of Ownership?

If you are unable to provide an acceptable release of interest or proof of ownership for the vehicle or major component parts as described above, [RCW 46.12.560\(3\)](#) requires an inspection for ownership-in-doubt as described in [RCW 46.12.680](#) and [WAC 308-56A-210](#). Ownership-in-doubt means applying for a three-year registration without title; after three years, a Washington title can be requested.

Equipment Checklist – Passenger Vehicle (for Road Use)

According to [RCW 46.04.382](#), a “Passenger car” means every motor vehicle except motorcycles and motor-driven cycles, designed for carrying ten passengers or less and used for transportation of persons.
