

HOME FIRE ESCAPE PLANNING

Be prepared and plan ahead!

- Know two ways out of every room and make sure they are always accessible
- Draw out your home fire escape plan
- Check your smoke alarm batteries regularly, test them monthly, and replace them every 10 years
- Conduct a home fire drill twice a year- once in the day-light and once when it is dark outside
- Have a designated meeting place a safe distance from your home (like a tree or mailbox)
